

What is claimed is:

1. A card comprising:
 - a display device;
 - 5 a thin film integrated circuit;
 - a first substrate; and
 - a second substrate,
 - wherein driving of the display device is controlled by the thin film integrated circuit,
 - 10 wherein a semiconductor element used for the thin film integrated circuit and the display device is formed by using a polycrystalline semiconductor film;
 - wherein the thin film integrated circuit and the display device are sealed with a resin between the first substrate and the second substrate of the card, and
 - wherein the first substrate and the second substrate comprise a plastic material.
 - 15
2. A card according to claim 1, wherein the card has a thickness from 0.05 mm through 1.5 mm.
3. A card according to claim 1, wherein the display device is a passive matrix
 - 20 type.
4. A card according to claim 1, wherein the display device is an active matrix type.
5. A card comprising:
 - a display device;
 - 25 a plurality of thin film integrated circuits;

a first substrate; and
a second substrate,
wherein driving of the display device is controlled by the plurality of thin film integrated circuits,

5 wherein the plurality of thin film integrated circuits are laminated;
 wherein the plurality of thin film integrated circuits and the display device are sealed with a resin between the first substrate and the second substrate of the card; and
 wherein the first substrate and the second substrate comprise a plastic material.

10 6. A card according to claim 5, wherein the display device is a passive type.

 7. A card according to claim 5, wherein the display device is an active matrix type.

15 8. A card according to Claim 5, wherein the plurality of thin film integrated circuits each have a thickness from 1 μm to 5 μm .

 9. A card according to Claims 1, wherein the display device is a liquid crystal display device.

20 10. A card according to Claims 5, wherein the display device is a liquid crystal display device.

 11. A card according to Claim 1, wherein the display device is a light emitting device.

25 12. A card according to Claim 5, wherein the display device is a light emitting device.

13. A card according to Claims 1, wherein the card is an ID card.

14. A card according to Claims 5, wherein the card is an ID card.

5 15. A card according to Claims 1, wherein the card is a semi-hard card.

16. A card according to Claims 5, wherein the card is a semi-hard card.

17. A card according to Claims 1, wherein the card is an IC card.

10

18. A card according to Claims 5, wherein the card is an IC card.

19. A booking-account system using a card comprising a display device and a thin film integrated circuit;

15 wherein driving of the display device is controlled by the thin film integrated circuit;

the card has a thickness of from 0.05 mm through 1.5 mm;

amount of money of a dealing that is dealt with an bank account in a financial institution, a date or a bank balance of the dealing is memorized in the thin film integrated circuit; and

20

the memorized amount of money of the dealing, the date or the bank balance of the dealing is displayed in the display device.

25
